**Subject:** ODF on Riparian Rule

Good news. See below:

1. **Oregon Board of Forestry, Riparian Rule Analysis** – On 9/3/14, the Oregon Board of Forestry voted unanimously in favor of continuing to analyze what changes might be needed in the Oregon Forest Practice Rules to provide greater buffer protections for medium and small fish bearing streams on private forest lands. Studies have shown that when applying FPA buffers to these waters, temperatures will increase above the State's "Protecting Cold Water" criterion 40% of the time. Contact: Alan Henning 503-687-7360.
